MEMORANDUM FOR: Chief, Security Analysis Group

VIA: Deputy Director of Security (PSI)

FROM:   
Director of Security

STAT

SUBJECT: DCI Security Committee - Unauthorized  
Disclosures Analysis Center (UDAC)

1. In a recent discussion with Chairman/SECOM regarding subject he mentioned that one of the biggest difficulties the UDAC has is getting the reporting agencies to include the specific cite from the actual classified document when reporting a leak to SECOM.

2. In order to update the Office of Security's contributions to the UDAC, it is requested that the Security Analysis Group review all of its inputs from October 1983. The purpose of this review is to insure that all of those inputs to the leak data base have included the specific cite from the classified document when it was available. If it is determined that the specific cite is available but was not included in the report, please forward that information to the UDAC.

3. Chairman/SECOM reiterated that the Security Analysis Group has been the most significant contributor to the UDAC. I appreciate your continued efforts to make this program a success.
